

ARGUMENT GUIDELINE

Winterhalter Rack Pass Through Dishwashing Machine GS 501

The GS 501 is a reliable dishwasher of tried and tested Winterhalter quality. The wash programmes of 120 seconds duration guarantees excellent wash results even with stubborn dirt and is thus particularly suitable for the small and medium-sized catering trade. Variable range of application due to easy conversion from straight to corner operation.

HYGIENE INTERIOR

- deep-drawn seamless hygiene tank in one piece with external tank heating
- extensive filter system above the water level
- wash distribution completely outside the interior
- WIHTec (Winterhalter Indirect Heating-Technology)

BENEFITS FOR THE USER

- due to rounded surfaces and corners no chance of dirt deposits – no intrusive heating element projects into the tank
- dirt is reliably kept out of the wash water
- no standpipes etc. which can become soiled
- constant wash temperature during the whole wash cycle with minimum electrical loading

CAPACITY

- balanced wash system with fixed wash arms below and rotating wash arms above
- impossible to lose high-powered wash jets

BENEFITS FOR THE USER

- even cleaning during the whole wash cycle; dishes remain in a stable situation
- excellent wash result even with stubborn dirt deposits
- free from clogging

ERGONOMICS / HANDLING

- easy to operate due to robust push buttons
- programme start by closing hood
- easily removed wash arms

BENEFITS FOR THE USER

- easy to understand – even with frequent personnel changes, no operating errors occur
 - user-friendly, fast, uncomplicated working
 - easier to clean
-

- wash arms freely interchangeable within the machine
 - rack carrier designed to pivot upwards or be removed completely
 - all equipment accessible from the front or side
 - completely ergonomic hood handle
 - maximum user-friendliness, as there is no danger of confusion
 - problem-free access to the interior of the machine
 - great ease of servicing
 - fast, ergonomic working
-
